Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 July 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restriction

Application's election without traverse of Group I, Species II (Claims 15-18) drawn to a Biochip array is acknowledged for prosecution in the subject application. Accordingly, claims 1-14 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Applicants have the right to file a divisional application covering the subject matter of the non-elected claims.

Claim Rejections - 35 U.S.C. § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15-18 are rejected under 35 U. S. C. § 102 (b) as being anticipated by U.S. Patent No. 6,362,482 to Stettner et al.

Art Unit: 2818

Regarding to claim 15, Stettner discloses a Biochip array comprising a CCD array 6; a phosphor screen (claim 10) supported by said CCD array; a microchannel plate (col. 9, line 24) supported by said phosphor screen; a photocathode (col. 9, lines 14-15) supported by said microchannel plate; and an array of biochips supported by said photocathode (abstract).

Regarding to claim 16, the Biochip array wherein said microchannel plate is aligned with said array of biochips (col. 9, lines 20-24).

Claim Rejections - 35 U.S.C. § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 17-18 are rejected under 35 U.S.C. 103 (a) as being unpatentable over U.S. Patent No. 6,362,482 to Stettner et al. in view of the remark.

Regarding to claim 17, Stettner discloses the claimed invention except for the Biochip array wherein said microchannel plate has sub micron spacing.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to form the microchannel plate that has sub micron spacing, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or working ranges involves only routine skill in the art. In re Aller, 105 USPQ 233.

Regarding to claim 18, Stettner discloses the claimed invention except for the Biochip array wherein detection of fluorescent signals at the CCD array is accomplished in parallel.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to form the Biochip array wherein detection of fluorescent signals at the CCD array is accomplished in parallel, since it has been held that rearranging parts of an invention involves only routine skill in the art. In re Japikse, 86 USPQ 70.
